Profile

Full-Stack Web Developer with a strong foundation in both frontend (HTML, CSS, JavaScript, React) and backend (Node.js, SQL, MongoDB) technologies. Originally from Rwanda, now based in Germany, combining technical versatility with a sharp eye for detail to build responsive, user-focused web applications. Experienced in IT support, warehouse operations, and currently advancing full-stack skills at Digital Career Institute. Multilingual: fluent in English, French and German (B1), enabling effective collaboration in multicultural environments.

Education

04/2024

Web Development Training | Certifacate DCI Digital Career Institute

- Completed a series of hands-on projects that focused on building responsive websites, which strengthened my coding skills and gave me practical experience in web design principles.
- Developed a personal portfolio website showcasing my work, helping me effectively demonstrate my skills to potential employers and clients.
- Collaborated with peers on group assignments, enhancing my teamwork abilities while learning to integrate various web technologies into cohesive projects.
- Gained proficiency in programming languages such as HTML, CSS, and JavaScript, which equipped me with the foundational skills necessary for a successful career in web development.

07/2017

Computer Science | Bachelor's degree Kigali Independent University(ULK)

- Developed a strong foundation in algorithms and data structures, which enhanced analytical thinking and enabled efficient solutions to complex programming problems.
- Completed hands-on software engineering projects, translating theoretical concepts into practical applications while strengthening skills in team collaboration and project management.
- Acquired practical experience in web development and database management through coursework, learning to build responsive web applications and manage data using MySQL, phpMyAdmin, and Apache.
- Collaborated on group assignments, developing essential communication, adaptability, and problem-solving skills in fast-paced, team-oriented environments.
- Became proficient in a range of programming languages including C, C++, Java, and PHP, gaining experience in both procedural and object-oriented programming.

07/2010

ICT and Electronics | Advanced Diploma(A1) IPRC Kigali

- Gained a comprehensive understanding of digital electronics, circuit theory, and microcontroller programming, laying a strong foundation in both hardware and software systems.
- Developed hands-on skills in troubleshooting electronic circuits, assembling components, and testing devices using industry-standard tools and techniques.
- Studied key areas of IT infrastructure, including computer hardware, network

Education

fundamentals, and system maintenance, enabling effective support and administration of technology systems.

- Engaged in practical training involving electronic prototyping, PCB design, and embedded systems, bridging the gap between theoretical knowledge and real-world applications.
- Strengthened problem-solving, technical analysis, and attention to detail, essential for diagnosing issues and ensuring system reliability.
- Built foundational programming skills and experience with common platforms and tools used in the electronics and IT fields.

Work Experience

04/2023

Neu Wulmstorf, Lower Saxony, Germany

Warehouse Worker **A&H Zeitarbeit Gmgh, Neu Wulmstorf**

- Utilized barcode scanners and inventory software to ensure precise and efficient order tracking and processing.
- Worked within a fast-paced logistics team, meeting tight schedules and maintaining accuracy under pressure.

08/2022

Winsen, Lower Saxony, Germany

Warehouse Worker **Amazon Winsen Gmgh**

- Processed customer orders by retrieving items from shelves using handheld scanning devices.
- Conducted quality checks to verify the accuracy and condition of products before packing.
- Contributed to smooth warehouse operations by maintaining order accuracy and team collaboration.

04/2014

Kigali City, Rwanda

IT Support and Supervisor **SPORTS GAMES RWANDA Ltd**

- Provided IT support across company branches, installing and maintaining computers, printers, and point-of-sale systems.
- Trained staff on new software, tools, and IT best practices to improve operational efficiency.
- Managed the procurement and distribution of IT supplies (e.g., laptops, printer paper, and accessories) to multiple shop locations.
- Oversaw regular cash collection and reporting from retail locations, ensuring accountability and accurate record-keeping.
- Played a supervisory role in maintaining the technology infrastructure supporting gaming operations.

Projects

02/2025 – present

Tiny Tales

A lightweight, full-stack web application designed for creating and sharing micro-stories for children aged 2–7. Users can compose short tales through a clean, intuitive interface and browse stories in real time via a dynamic feed.

- Implemented user authentication with JWT and integrated EmailJS for notification functionality.
- Built with Node.js, Express.js, and MongoDB on the backend, and HTML5, Tailwind CSS, and JavaScript on the frontend.
- Focused on performance, responsiveness, and accessibility to ensure a family-friendly user experience.

02/2025 – 02/2025

Fullstack Blogging Platform

A complete blogging system that allows users to create, edit, publish, and

Projects

categorize blog posts, as well as engage with readers through comments. Designed to support both content creators and readers in a structured, modern UI.

- Engineered both frontend and backend using HTML5, JavaScript, Tailwind CSS, Node.js, Express.js, and MongoDB (NoSQL).
- Features include post categorization, tagging, and real-time content management.
- Ensured seamless user experience through clean routing, RESTful APIs, and data-driven components.

11/2024 – 11/2024

Music Player

A modern and interactive **music streaming web app** that allows users to play, pause, skip, and adjust volume for a curated playlist of audio tracks.

- Developed the frontend using **React, Tailwind CSS, Vite, and JavaScript**, with media handled via the **Web Audio API**.
- Designed a sleek UI with real-time controls and responsive layout for optimal playback across devices.
- Emphasized performance optimization and user interactivity for a smooth listening experience.
